

# Coffee Shop

## \*Input & Output Table with LocalStorage with Delete Method

May I create a Project Using HTML, CSS and JavaScript ...  
This project is very small, but create an idea with.

1. How to create an input type box?
2. How to use LocalStorage?
3. How to delete one by one output data?

I Frist created an input table than designed it and later modified it with JavaScript.

\*\*\*Let's see how this work:-

\*Add to Items in the order list ...

Real Caffee

127.0.0.1:5500/CoffeeShop.html

Home About Contant Gallery Login

Welcome to our Coffee Shop

**Type your order please**

ENTER YOUR ITEM NAME: Enter your Item Name

ENTER YOUR DESCRIPTION: Enter your description here

Add Items Clear List

**Your Items**

S.NO	Item Title	Item Description	Action
1	coffee	one spoon sugar please	Delete
2	tea	with hard	Delete

ENG IN 10:47 12-04-2022

\*Now see how to Work the LocalStorage.....

**Real Caffe**

Home About Contant Gallery Login

Welcome to our Coffee Shop

**Type your order please**

ENTER YOUR ITEM NAME:

ENTER YOUR DESCRIPTION:

Add Items Clear List

**Your Items**

S.NO	Item Title	Item Description	Action
1	coffee	one spoon sugar please	Delete
2	tea	with hard	Delete

127.0.0.1:5500/CoffeeShop.html

LocalStorage

```
[[{"coffee", "one spoon sugar please"}, {"tea", "with hard"}]]
```

\*Right now, I'm clearing the whole list ...

127.0.0.1:5500 says  
Are u sure to clear the all data!

OK Cancel

ENTER YOUR ITEM NAME:

ENTER YOUR DESCRIPTION:

Add Items Clear List

**Your Items**

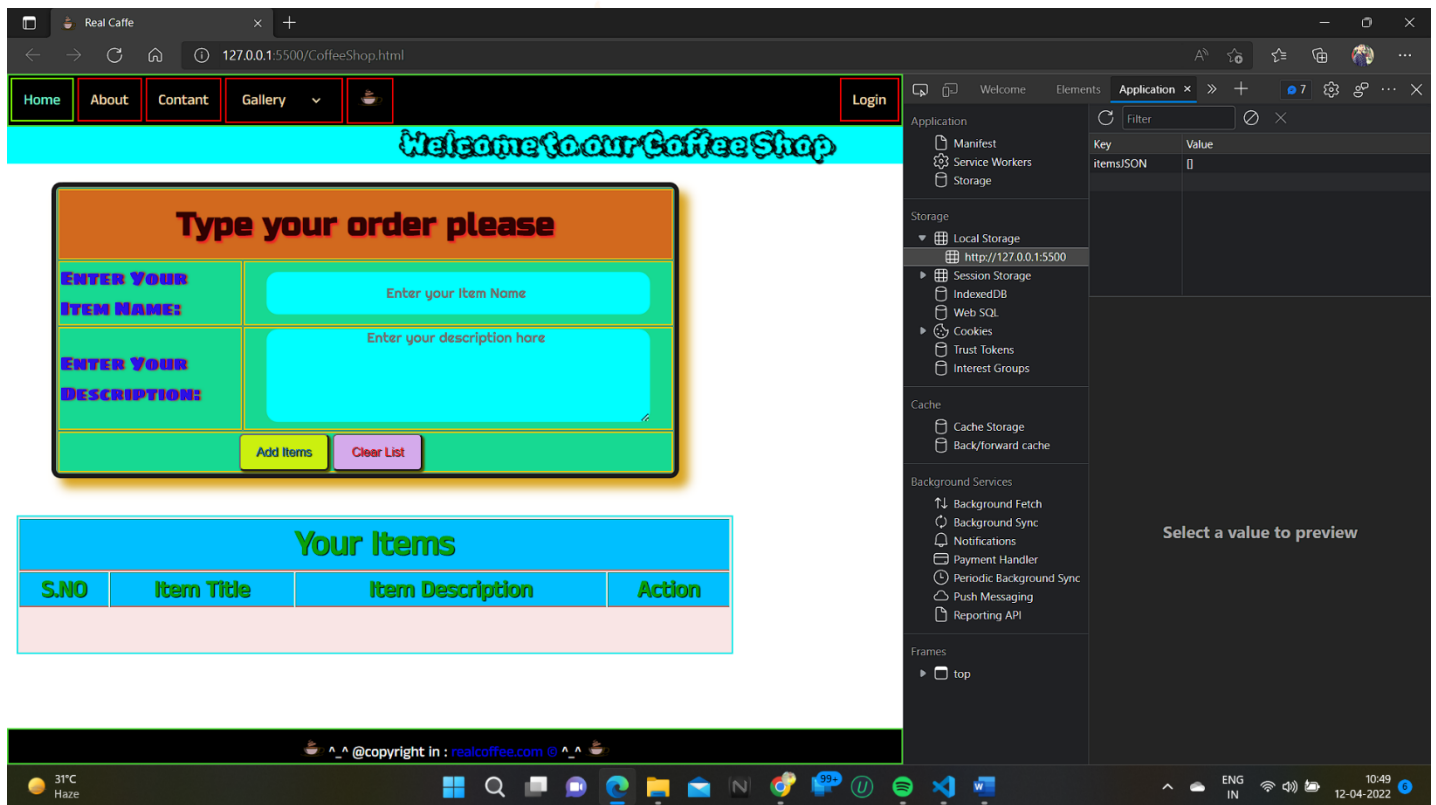

S.NO	Item Title	Item Description	Action
1	coffee	one spoon sugar please	Delete
2	tea	with hard	Delete

127.0.0.1:5500/CoffeeShop.html

LocalStorage

```
[[{"coffee", "one spoon sugar please"}, {"tea", "with hard"}]]
```

\* I saw that my LocalStorage is working properly, the whole list has been deleted ...

\*This project just for practice HTML, CSS and JavaScript languages

Editor: vs code

Thanks for Watching this Project.
