

Online Payment System

Using HTML, CSS, JavaScript (Functions) & Razorpay Payment Gateway

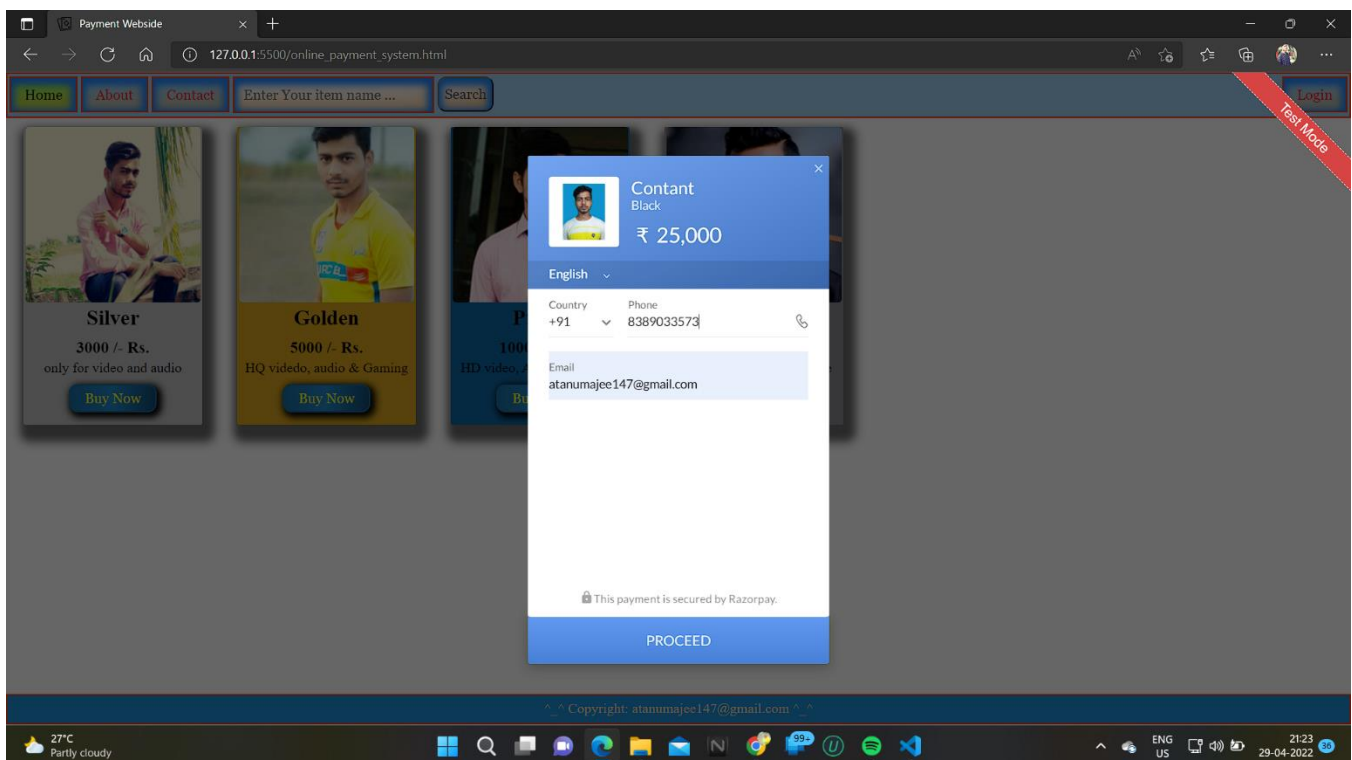

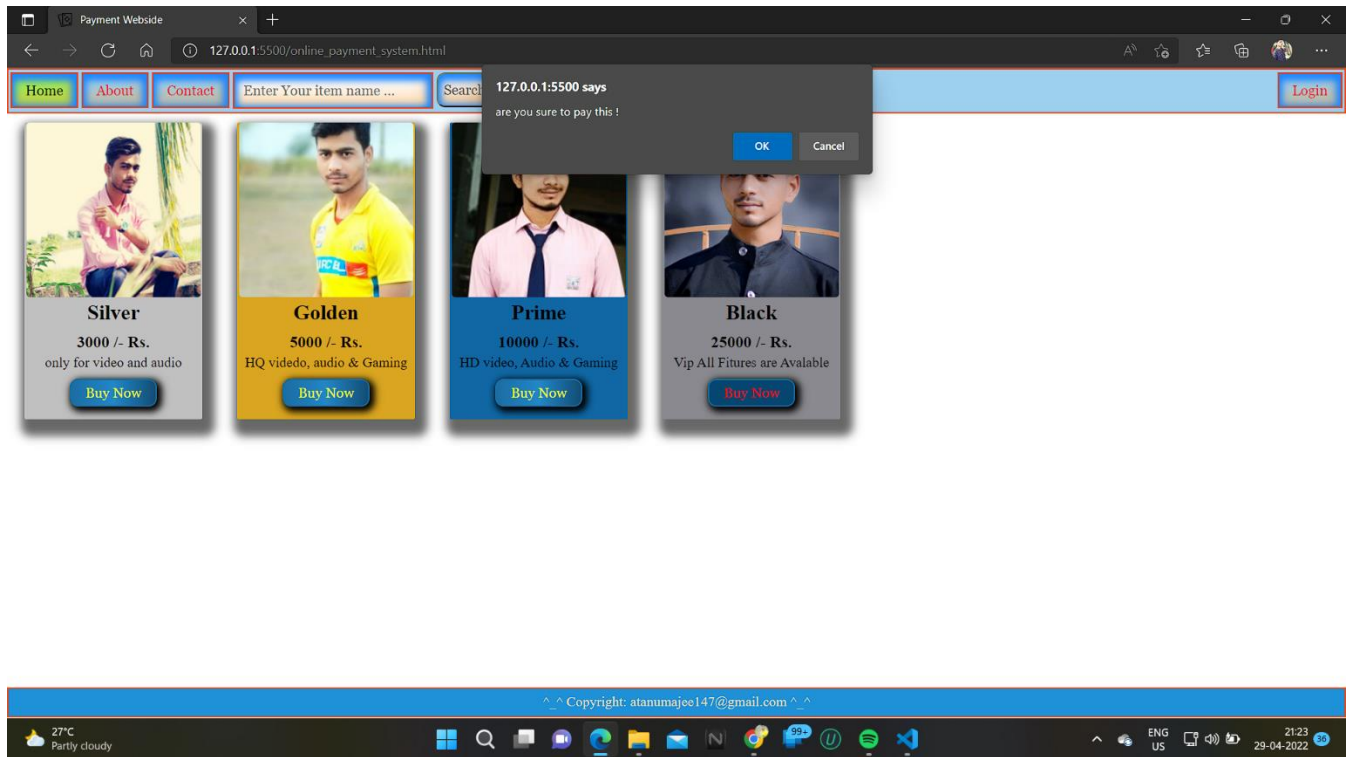

Today I will create a small project where you can make paid purchases online easily. And this is an example of how to use an online payment gateway. Moreover, here we can see the products can be searched.

Let's take a look at our shopping website:

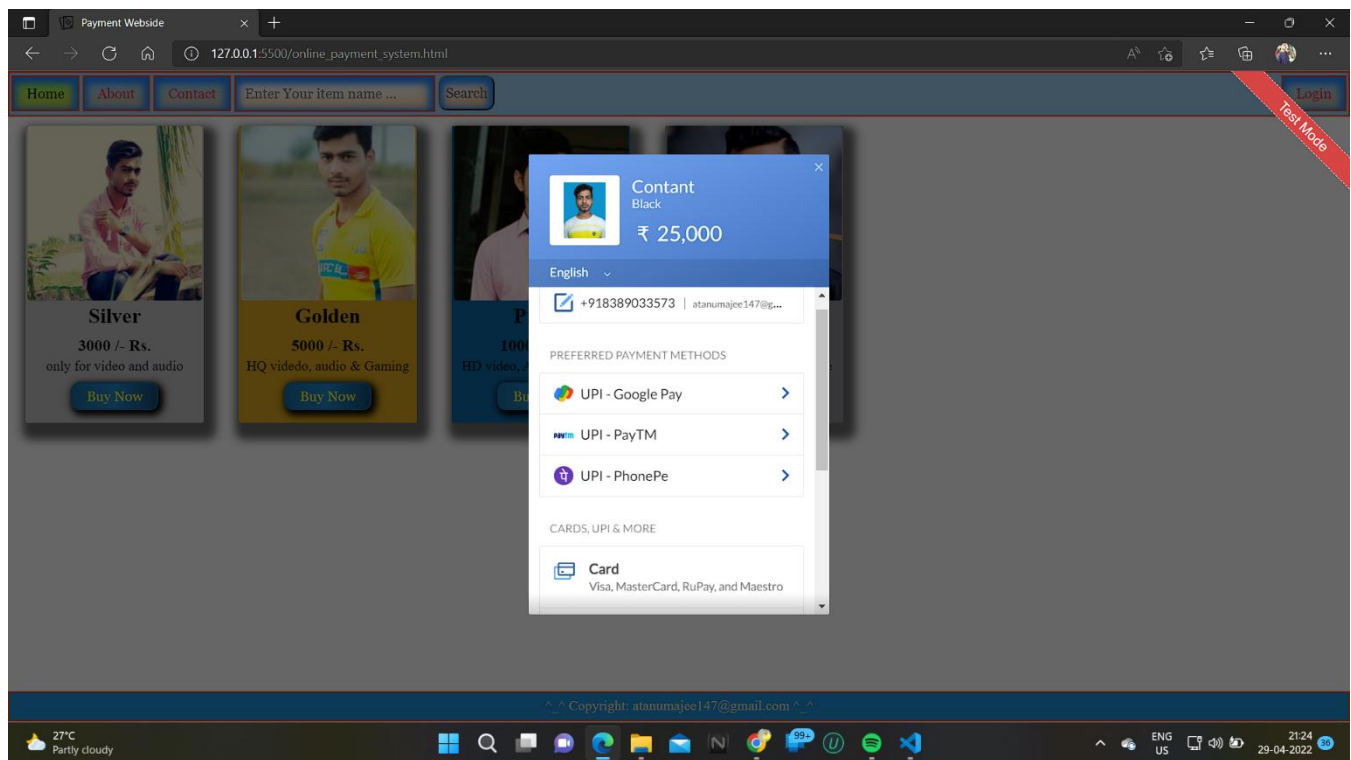

This is a picture of my website where by clicking on 'Buy Now' button alert popup will be open...

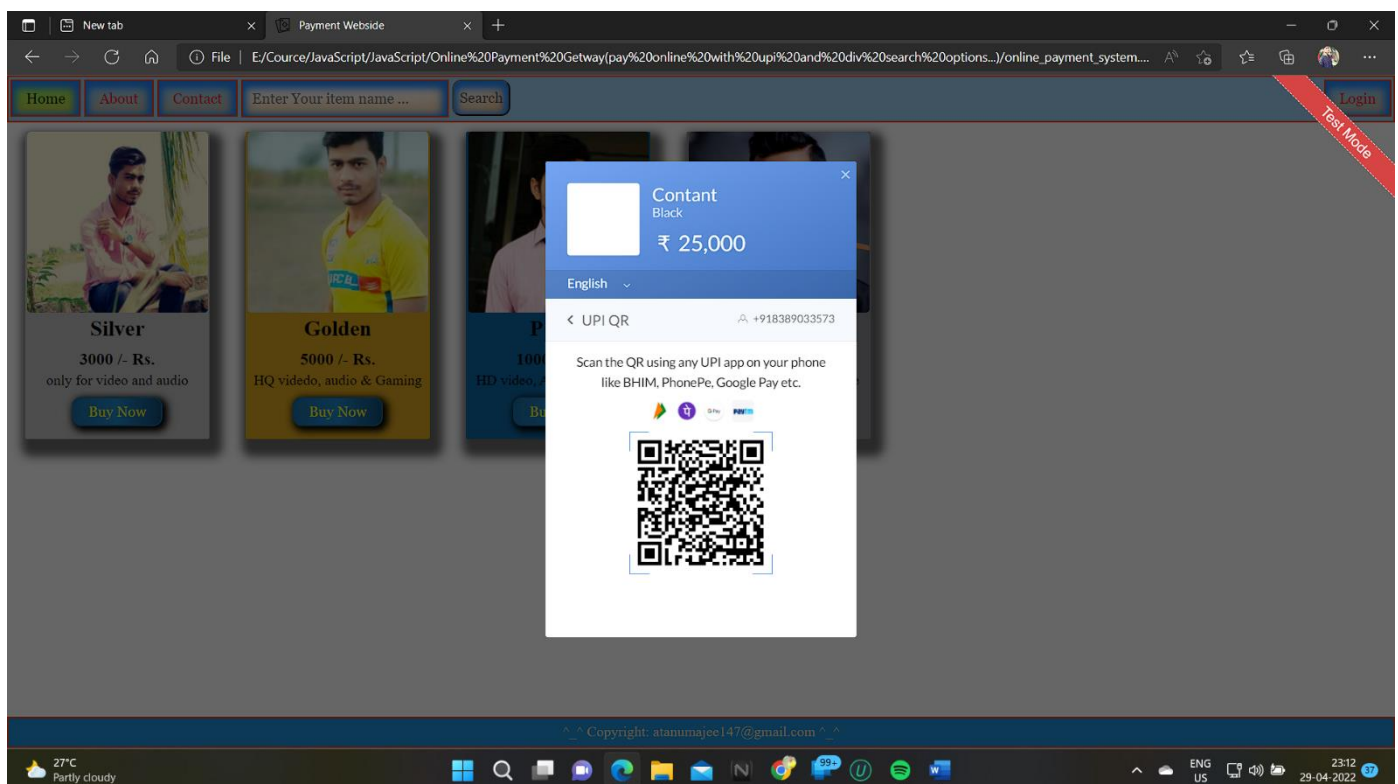

Now I will press the 'Buy Now' button and see

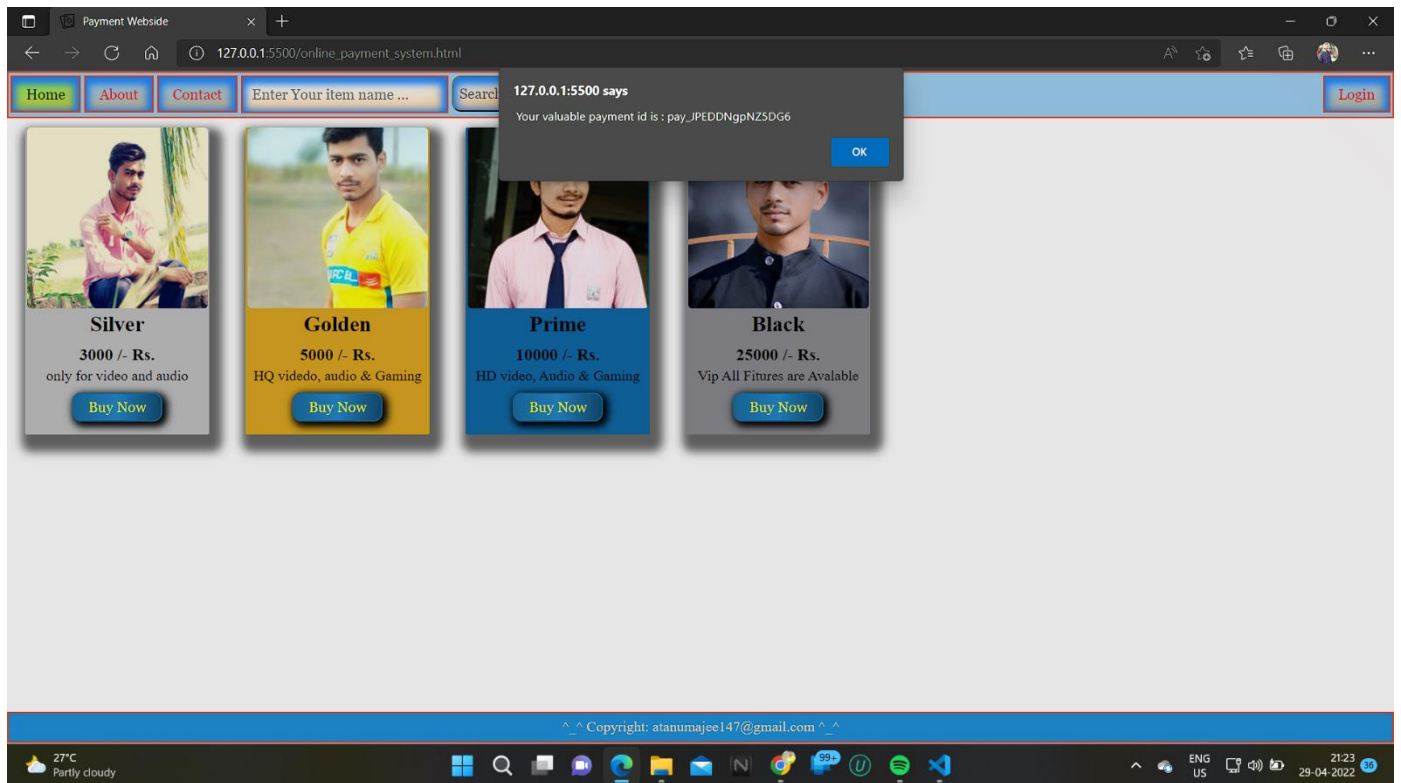

When I enter my Mobile number and Gmail id than proceed:

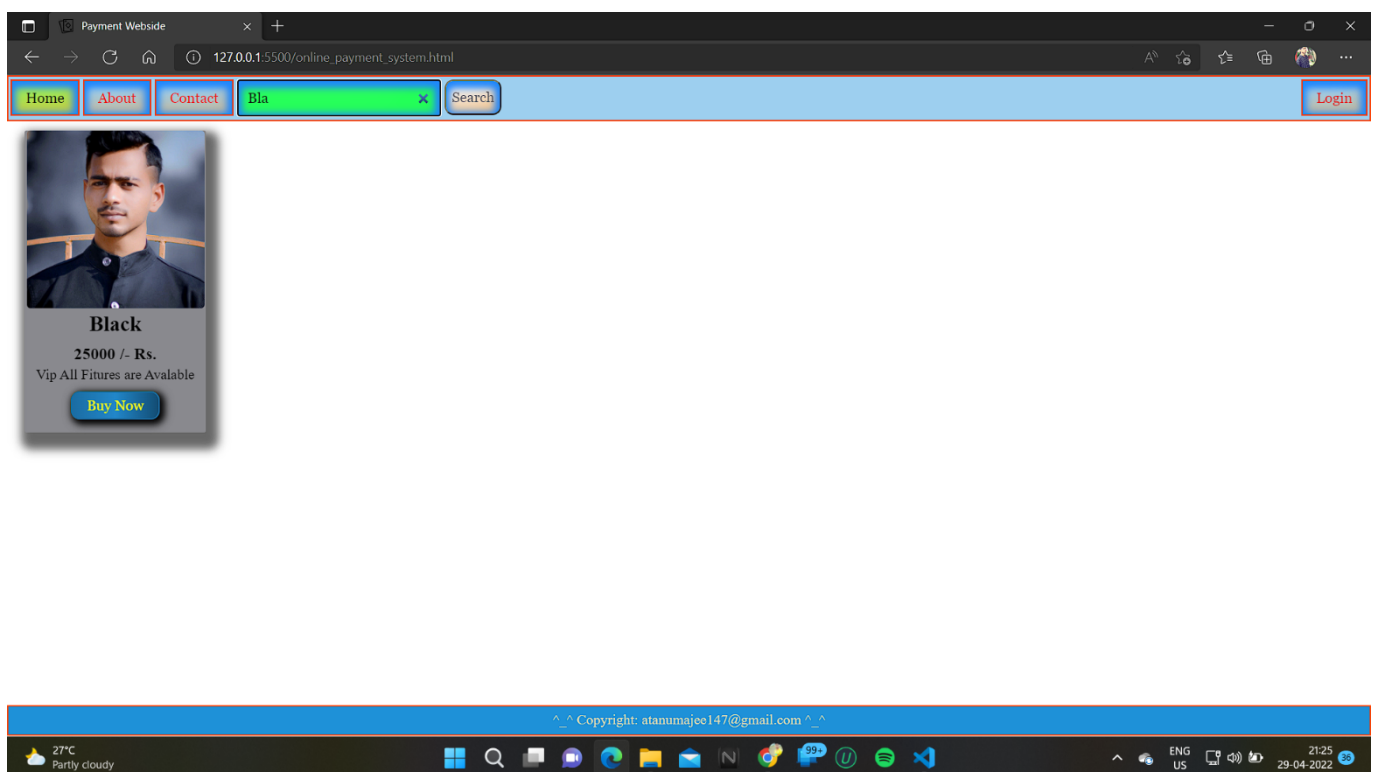

#After choosing the payment method:

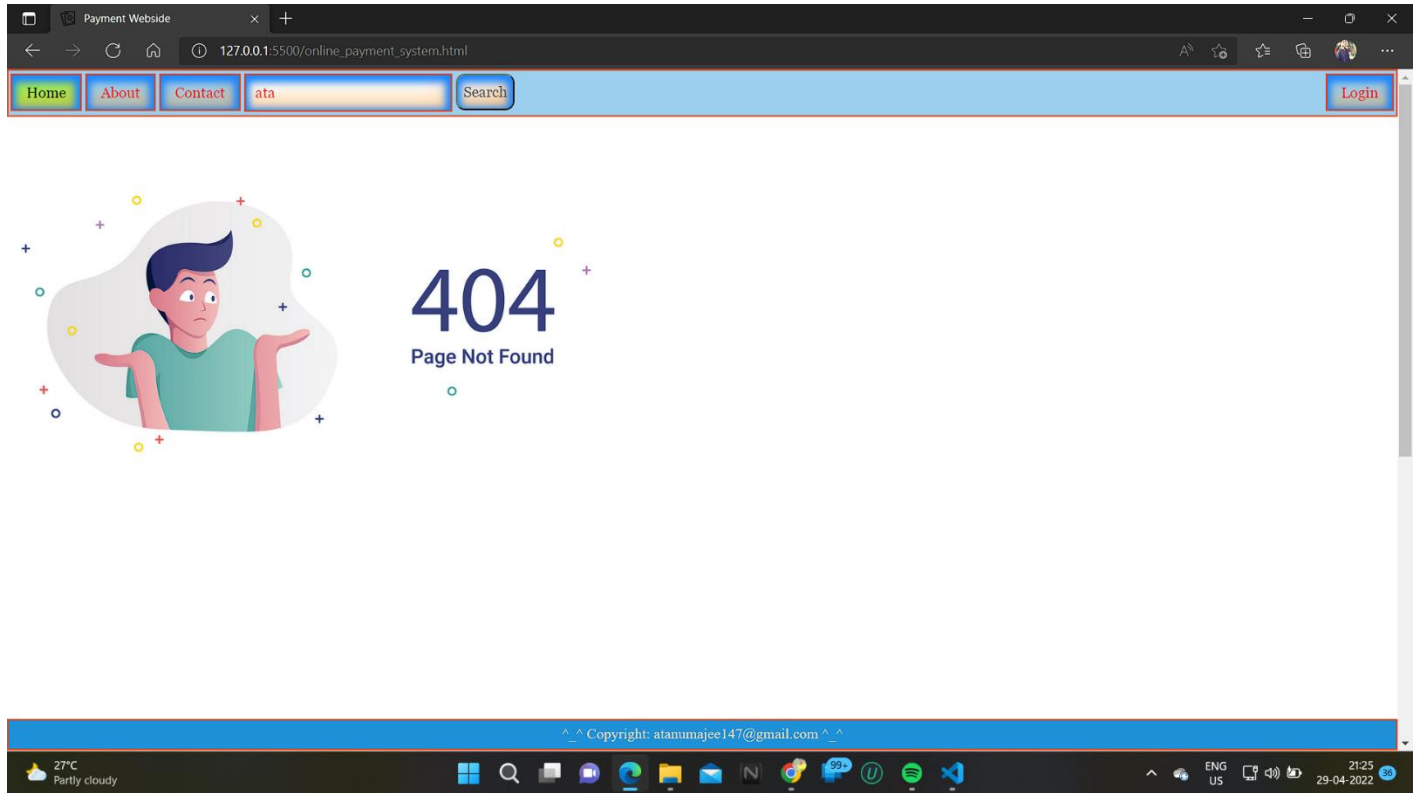

I will the transaction ID after completing my payment:

When I go to the search bar, then look for the product:

When I can't find my searched product on the website:

This project just for practice my HTML, CSS, JavaScript and the help of Razorpay Payment Gateway

Editor: vs code editor

Thanks for watching this project
