

Data Search Table

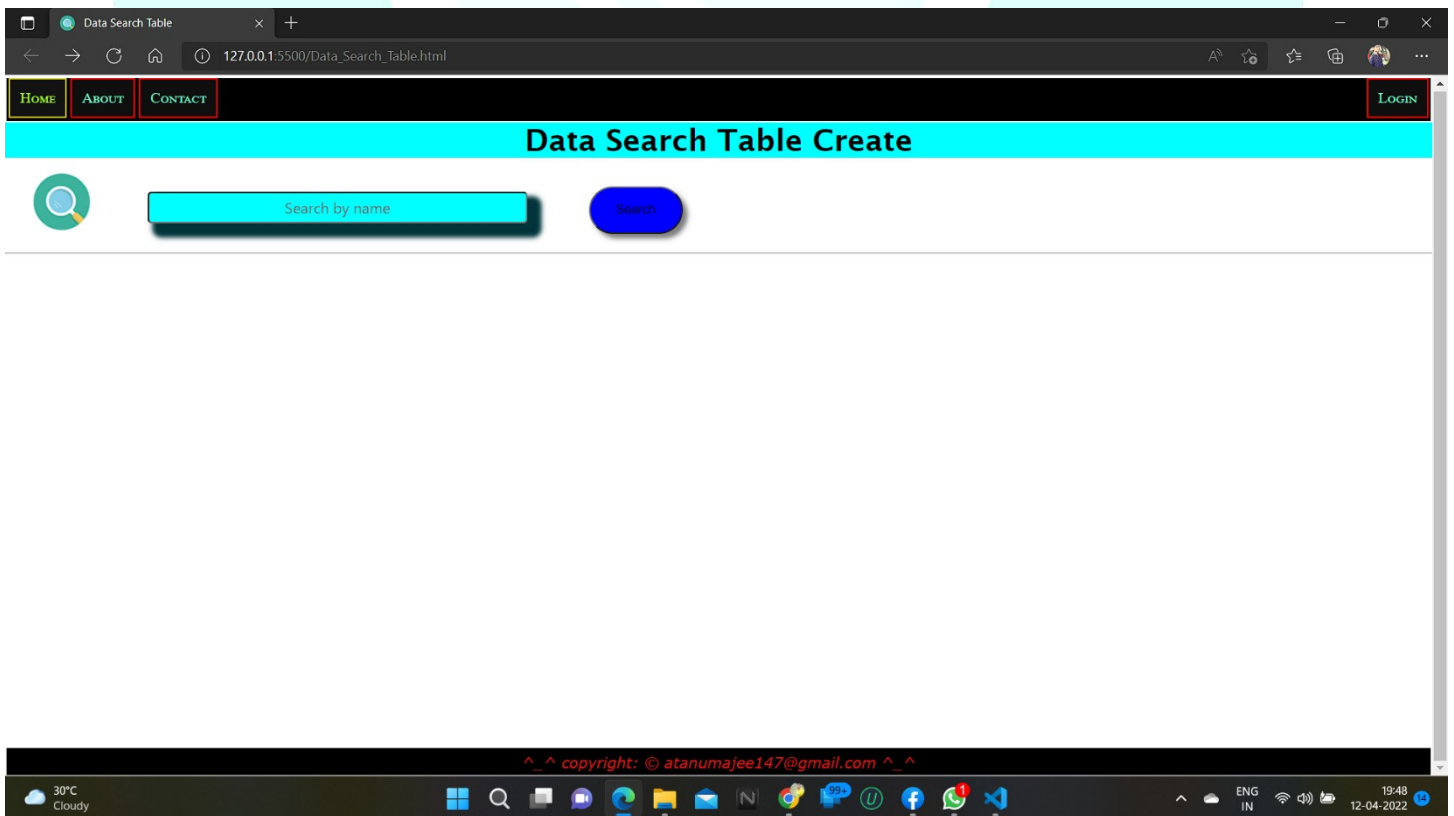

Using JavaScript Function (onclick ())

I created a small project where I took an array that has an object in it and that object contains all the data in the table.

The main thing is that I have created a search bar, if you search there you can find all the data in the table.

This project I have used Onclick Function and Loop, Array, Object, if-else

***Watch the Data Search Table**

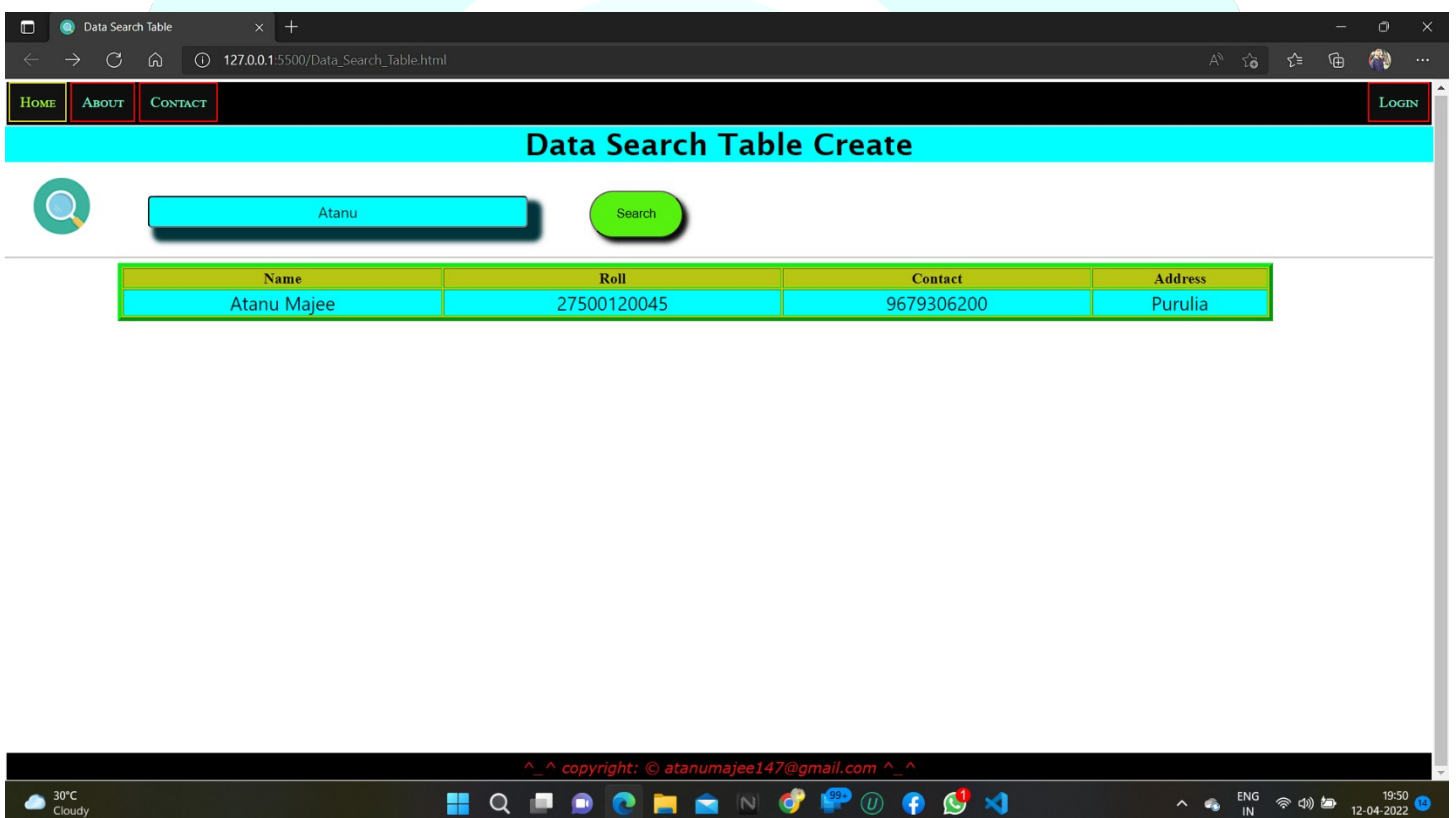

*Click to search bar or search icon than see the table :

The screenshot shows a web browser window with the title "Data Search Table". The address bar displays "127.0.0.1:5500/Data_Search_Table.html". The navigation bar includes links for "HOME", "ABOUT", "CONTACT", and "LOGIN". The main heading is "Data Search Table Create". Below the heading, there is a search bar with the placeholder text "Search by name" and a "Search" button. A table with four columns (Name, Roll, Contact, Address) is displayed, containing six rows of data.

Name	Roll	Contact	Address
Atanu Majee	27500120045	9679306200	Purulia
Sarbani Lohar	27500120045	9749494679	Durgapur
Dolan Champa Biswas	27500120042	8945716492	Nodia
Thamim Mollah	27500120046	9784581248	Howrah
Sanatan Bag	27500120040	6971642645	Sundorbon
Tamal Das	275001211	7548464521	Purulia

*Type a name on the Search bar and hit the Button:

The screenshot shows the same web browser window as the previous one, but with the search bar containing the text "Atanu" and the "Search" button highlighted. The table below now displays only one row of data, corresponding to the search results for "Atanu".

Name	Roll	Contact	Address
Atanu Majee	27500120045	9679306200	Purulia

This project just for practice HTML, CSS and JavaScript languages

Editor: vs code

Thanks for Watching this Project:
